**SUBJECT: Disulfoton, Statement of non-confidential nature of proposed labels**

Per our phone conversation this week, BAYER is agreeable to the Agency placing the labels proposed for review for Di-Syston 8 (EPA Reg. #3125-307) and Di-Syston 15 % Granular (EPA Reg. #3125-172) Insecticides into the public docket and available on the web. This agreement is based on the assumption that the Agency will somehow clearly indicate on the labels ... that they are "DRAFT" or "Under EPA Review" at the present time.

Also, as you pointed out, reference to tomatoes on the 8E label and lettuce on the 15 G labels (page 3, first line of RECOMMENDED APPLICATIONS) should be deleted. I will followup with Mr. LaRocca with an amended label reflecting these corrections.

As always, if you have any need for additional information, please feel free to call me at 816-242-2838.
